PROTECT AGAINST FOODBORNE ILLNESS

SAFTEA® LINERS AVAILABLE IN TWO STYLES

Saftea® Liners are available in both an open-top design as well as our patented zip sliding seal. Both liners offer superior protection against harmful bacteria or viral contaminants entering or forming inside the liner—both of which can lead to foodborne illness. Both liners also provide for a scrub-free cleaning system, since the liner never comes in direct contact with the urn. So what are the key differences?

SLIDING ZIP LOCKING SEAL

The patented zip-sliding seal top provides maximum food safety by protecting against ingredients or contaminants accidentally falling into the tea urn. The protective seal also makes it easier to move the dispensers without spills, allowing for safe, repeated refills throughout the day.

OPEN-TOP LINERS

The Saftea® Liner Open-Top is designed for speedy fill and refilling needs. Offering the same quality as our patented sliding lock tea urn liner, the open-top version is ideally suited for operations with high-volume dispensing, requiring frequent refills with added ease and speed.

- Improved Taste
- No Cleaning Chemicals
- Superior Hygiene
- Increased Sales & Profits

ORDER ONLINE

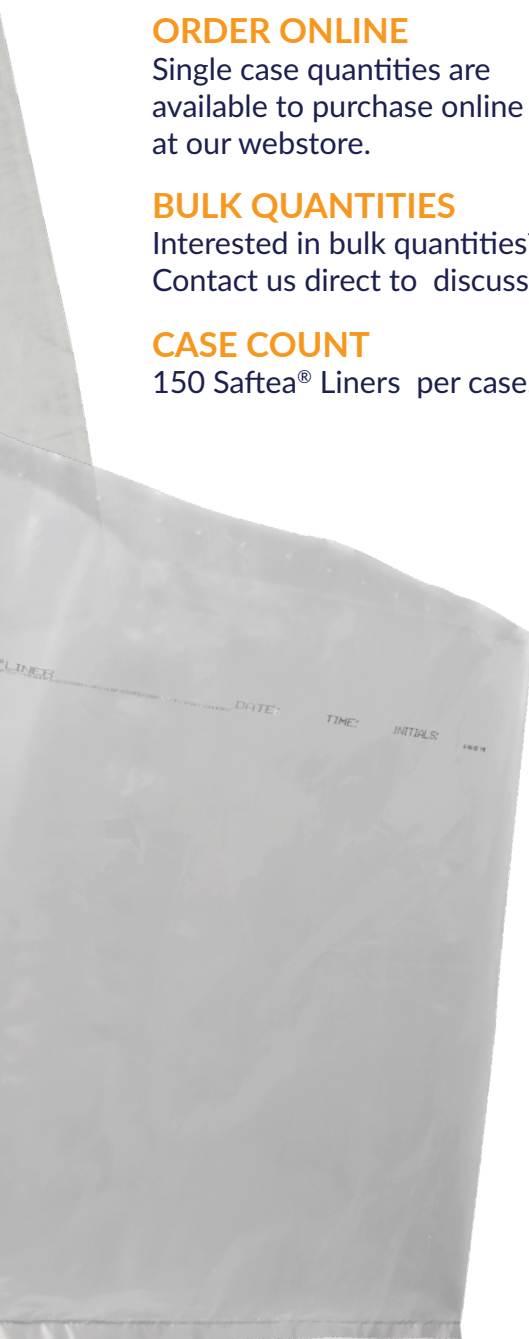

Single case quantities are available to purchase online at our webstore.

BULK QUANTITIES

Interested in bulk quantities? Contact us direct to discuss.

CASE COUNT

150 Saftea® Liners per case.

IMPROVE OPERATIONS AND SAFETY

PROFITABLE

Save time and labor costs since it takes less than a minute to replace a liner, compared to the time it takes a crew member to disassemble, clean, sanitize and reassemble a traditional unlined urn. If your restaurant has more than one urn, multiply that time savings accordingly. Additional savings are also gained without the need for cleaning chemicals.

As a bonus, Saftea® Liners actually improve the taste! Your customers will enjoy consistently fresher, better tasting iced tea, free from the aftertaste of improperly rinsed urns which results in increased sales for your operation.

HYGIENIC

It's no secret that teas are prone to mold. Improper cleaning results in bacteria forming inside the urn and spigot which can lead to health risks and food borne illness.

With Saftea® Liner, the tea never comes in direct contact with the urn or spigot, creating superior sanitation and quality standards for your food service establishment. As a bonus, it actually improves the taste! Your patrons will enjoy consistently fresh iced tea without the aftertaste of improperly rinsed cleaning chemicals.

WRITABLE SURFACE

Efficiently monitor usage by recording the date and time directly on the liner using a felt-tip pen, ensuring timely replacement. While the liner can be refilled and reused throughout the day, it is recommended to replace it every 24 hours or when switching beverage flavors to maintain optimal quality.

- Prevents Spills
- No Scrubbing

Saftea® Liner

EASY THREE STEP PROCESS:

HOW IT WORKS

1

Replace spigot with new pinch-tube spigot. Open spigot.

2

Place Saftea® Liner in urn. Feed tube through opening until it protrudes, and close spigot. Drape liner over outer rim.

3

Pour or brew directly into lined urn. Open-Top liners can remain draped over the sides, while the sliding zip locking liner can be sealed and tucked inside. Close lid. Use a rubber spatula to stir the tea to avoid damaging the liner. **MAX HOLDING TEMP: 185° F.**

SAFTEA® LINER OUTPERFORMS THE COMPETITION

A STUDY CONDUCTED BY EUROFINs

MICROBIOLOGY LABS FOUND:

Fungal organisms (yeasts and molds) levels proved to be "10-100 times less" using Saftea® Liner when compared to a competitor liner or no liner at all.

Plascon's Saftea® Liner "may increase both the shelf life and overall safety of brewed tea held in these urns over extended storage times."

WHAT FOOD SERVICE PROFESSIONALS ARE SAYING:

Chick-fil-A

"Our team members, and guests can really taste a difference of quality, and ease of use since we began using Saftea® Liners"

- Wilson Yang

Yonge and Bloor Franchisee
Toronto, Canada

MIDLAND COUNTRY CLUB

Since implementing Saftea® Liners they have been an absolute time and money saver! No more wasted time on breaking the urns down for cleaning. Such a simple design with great results! Thanks for all you do!" - Todd Andres

Food & Beverage Manager
Midland, Texas

RECYCLABLE

Help protect the environment by recycling your used liners. Please remove the tube and discard before recycling.
