

Plascon®

BOX LINERS

PREMIUM FOOD GRADE & INDUSTRIAL LINERS

Many products packaged in corrugated boxes, cartons, or crates require a reliable inner liner to guarantee proper containment and product safety. Plascon specializes in both food grade and commercial/industrial liner applications for a wide range of applications.

MADE IN THE USA

Plascon films are manufactured in our blown films plant located in Traverse City, Michigan. As the direct manufacturer, we are able to identify and create exactly the right film to meet your application and needs.

Our food-grade liners utilize USDA/FDA-approved resins, and our manufacturing facility is BRCGS 'AA+' certified. Liners can be made using either clear or colored films.

AUTOMATED LINING SYSTEM COMPATIBLE

Our polyliners are compatible with all of the automated box lining systems on the market, including Pattyn Packaging, Niverplast, K&R Equipment, OK International Group, Pearson and Thiele Technologies. Additionally we will custom engineer roll stock to fit your specific application and machinery. Our manufacturing system creates a liner that is form-fit to the final container creating a custom look and maximizing product yield.

SINGLE CASE OR LARGE QUANTITY ORDERS AVAILABLE

MADE WITH USDA/FDA APPROVED RESINS

MANUAL BOX LINING SYSTEM AVAILABLE

For smaller quantities, Plascon's EasyLine Manual Bag Placement System increases production rates by up to 50%, and provides a more ergonomic work environment for employees.

GUSSETED LINERS

Optimizes space with form-fitting corner-to-corner coverage.
